

ELIMINATOR GAPMASTER II

SOFT-SIDED DOCK SHELTER

Seals trailer hinge gaps

Durable GapMaster hooks grasp firmly around hinges of open trailer doors to seal gaps that other shelters leave exposed.

Durable foam frame design

Takes impacts from off-center trailers without the need for expensive steel bumpers.

Poly-wrapped side frames

Give unit stability, yet can be fully compressed — immediately returning to original shape and position if impacted.

Pivoting canopy header

Protects unit from damage if trailer comes in off-center and higher than expected.

Integral rain gutter

Diverts water off sides of shelter.

Detachable side curtains

Easily removed for maintenance flexibility or to allow increased air flow on the dock. Reattach in minutes.

Durathon fabric

Friction-resistant, highest-wear fabric provides ultimate durability. (Optional)

Firefighter protection

Heat-dissipating technology in head curtain prevents burning from hot trailer marker lights. (Optional)

PitMaster Under-leveler Seal

THE INDUSTRY'S ONLY IMPACTABLE
FULL-ACCESS DOCK SHELTER THAT ALSO
PROVIDES HIGH SEALING EFFICIENCY

Eliminator-Gapmaster II soft-sided shelter combines the sealing efficiency of a foam dock seal and the full access of a dock shelter. Rugged GapMaster hooks provide a seal around trailer door hinge gaps without restricting access to loads, keeping expensive energy inside your building, and bugs, dust and weather out. Plus, slim, ultra-durable side frames can take repeated hits from off-center trailers without damage.

RITE·HITE®

ELIMINATOR

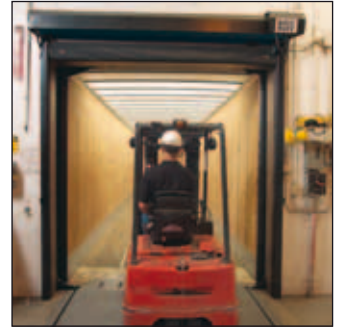

GAPMASTER II

Ultimate sealing efficiency for immediate payback

Ordinary shelters can't seal the hinge gaps created by swing-out trailer doors. Unsealed, these gaps equal about 0.6 m² of open air. Eliminator-GapMaster, however, seals these gaps. Depending on climate, you can save as much as \$1000 per year, per dock position, in recovered energy costs. Plus, sealing open hinge gaps helps eliminate "white space" at the dock, minimizing dust and insect infiltration and making inspections easier to pass.

Ordinary shelter leaves trailer door hinge gaps exposed

Gaps are sealed with Eliminator-GapMaster, without restricting access to the trailer

Ultimate flexibility

Narrow 150 mm wide side frames allow the shelter to fit into the narrowest of spaces, and can eliminate the need for expensive repositioning of lights, signs and electrical conduit. 3405 mm shelter footprint stays the same, regardless of projection.

Easily removable and reattachable side curtains

Remove, replace or change out Velcro-attached side curtains for the greatest maintenance flexibility. An exclusive Frommelt® feature.

Enjoy your investment for years to come.

Only Frommelt Eliminator-GapMaster II soft-sided shelters deliver all these exclusive benefits and come backed by a standard 36-month, money-back customer satisfaction guarantee when ordered with premium Frommelt fabrics.

See your Rite-Hite Representative today.

Or visit our website for more information on the Eliminator-GapMaster II and the full line of additional Frommelt solutions, including the new PitMaster Under-leveler Seal. PitMaster keeps facilities cleaner and helps dramatically reduce energy loss at the dock.
